PNA-E40 KIT**Chem Service Now Offers Pesticide Solutions.**

All of our Pesticides are now available in solution. Most at 100ug/mL and are in the most suitable solvent to ensure solubility and stability. As always, our Pesticide Solutions will come with a MSDS and a Certificate of Analysis. Every solution is prepared from certified neat components and solvents and then is analytically compared with an independently prepared solution.

We quantitatively test our solutions so you do not have to test them.

If you do not see the solution you are looking for, just call us for details.
