

British Pharmacopoeia

Background

British Pharmacopoeia chemical reference substances (BPCRS) available from BP are issued under the authority of the British Pharmacopoeia Commission and are solely for use in tests and assays of the British Pharmacopoeia or the British Pharmacopoeia (Veterinary).

The list in this catalogue is current and includes all available BPCRS needed to follow the current official monographs. Most BP monographs for active substances conform with the monographs issued by the European Pharmacopoeia, and so require the use of European Pharmacopoeia chemical reference substances. Details of these are to be found under the 'European Pharmacopoeia' section of this catalogue.

Production and certification

British Pharmacopoeia reference substances and preparations are selected and verified by the BP Laboratories as being suitable for the use as prescribed in the relevant monographs of the British Pharmacopoeia.

Documentation

BPCRS are of two types – normal CRS for identification purposes and Assay Standards. Assay Standards are provided with a documented assay value, determined by the BP Laboratories. The values are given in a booklet provided with the reference substance.

The BP laboratories do not make available any other BPCRS certificates of analysis or other information, in connection with the prescribed use of the BPCRS.

Controlled substances

Controlled drugs are subject to import and export control restrictions. Please contact LGC Standards for details.

Shelf life and expiry dates

British Pharmacopoeia chemical reference substances are subjected to regular inspection and repeat analysis by BP scientific staff. Each BPCRS is, on receipt by the customer, fit for the intended use. BPCRS are supplied with a shelf life of three months from the date of despatch. Since the BP has no way of verifying how customers have stored the vials, BP only gives a limited "guarantee" of the BPCRS for a short time. After this, it must be the responsibility of the user to ensure correct storage and use. However, lots with invalid lot numbers should not be used any more.

BP supplies only current lots. For this reason users are advised to order only as required.
